Roofglaze

The one-stop solution for natural light

Established for over ten years, Roofglaze is one of the UK's leading rooflight specialists.

We offer a complete range of services designed to provide roofing contractors and specifiers with a single, reliable source for rooflighting expertise and solutions.

We cover everything – from specification and design to completed installations by our own, factory-trained teams.

Our rooflights are manufactured in the UK and the Netherlands, to comply with all European standards and UK Building Regulations.

Modular rooflights from stock

Our high quality modular rooflights provide efficient distribution of natural light, with a variety of ventilation options.

- Rectangular, square and circular domes and pyramids, in a wide range of standard sizes
- Top quality UV protected polycarbonate glazing offers high impact strength and resistance to UV degradation
- Double, triple and quadruple skin units in clear, diffused, opal and bronze tints
- Guaranteed for ten years against discolouration and loss of light transmission / impact strength
- Fully tested to the latest UK Building Regulations with U-values for complete units as low as 1.3, exceeding the current requirements

Access hatches & smoke vents available

Custom skylights

Whatever the scale or scope of your project, you can draw on our expertise to provide a stunning solution.

Our custom-built skylights range from faceted domes and pyramids, to purpose-made barrel vaults and mono-pitch structures. They have been installed in all kinds of applications from retail centres, museums, commercial premises, sports facilities, hotels and private homes throughout the UK.

Glass & polycarbonate skylight designs

Versatile continuous barrel vaults

Our attractive, made-to-measure barrel vault rooflights are a cost-effective way of introducing natural light to all kinds of buildings.

- Versatile, self-supporting system for use on roofs, walkways and as canopies
- Low- and high-rise profiles, in spans from 0.6m to 9.0m.
- Wide range of glazing options including solid polycarbonate in double and triple skin cassettes,

- multi-wall and nanogel-filled polycarbonate. All glazing options are available in clear, diffused, opal and bronze tints
- Wide range of ventilation and opening options, from louvre vents in end panels, to complete opening bays for both natural and smoke ventilation

Nanogel-filled multi-wall glazing available

Mono-pitch & patent glazing

We offer a variety of in- and out-of-plane systems in glass or polycarbonate, to suit any pitch of roof above 5°.

A variety of glazing bars is available and spans from 500mm upwards can be accommodated.

Pyramids, ridgelights & lantern lights

Custom-made appearance, from a range of standard components... that's our range of pyramids, ridgelights and lantern lights

With pyramids from 900mm square to 7000mm and a wide range of ridgelights and lanterns with hipped and gable ends, we can provide attractive, cost-effective solutions to meet a wide range of specifications.

These stylish rooflights are equally suited to new build and refurbishment projects.

What do Roofglaze customers think?

“Professional, reliable service. The installation team was very impressive and completed the project with time to spare.”

Roofing contract manager

“We rely on the practical knowledge of the people at Roofglaze, to come up with the right solution for each job.”

Roofing specifier

“Roofglaze is our preferred supplier for rooflights. They work the way we do - which makes for an easier life.”

Site Manager

Octagonal rooflights

Our octagonal shaped rooflights provide attractive and cost-effective solutions for all kinds of applications.

Glazed in either glass or UV protected polycarbonate, they are available in a range of standard configurations, in diameters from 2000mm

to 8000mm. They can be supplied as lantern lights with vertical glazed skirts typically 500mm high - or fixed direct to a proprietary curb.
