

Cantilever Glass Canopies

NEW

**PART M
COMPLIANT
CANOPIES
AVAILABLE**

La Pensilina is a stunning horizontal glass canopy designed to add stylish protection around the vital areas of your property.

Supported by a slim aluminium profile to enhance the building aesthetics, yet able to resist extreme loads and weather conditions.

La Pensilina cantilever horizontal glazing system requires no supporting rods or glass cut outs and will resist extreme conditions of snow and wind, in addition to the weight of the glass itself.

Made up of a load-bearing slim aluminium profile, seals and terminal finishing caps without any visible screws to create a stunning minimalist profile.

La Pensilina

A perfect balance between form and function

Cantilever Glass Canopies

Features:

- ▶ Load-bearing extruded aluminium.
- ▶ TPE glass holder and wall seals, grey coloured.
- ▶ Grivory® locking cams and safety elements for maximum mechanical and ageing resistance.
- ▶ End caps in matching finishes.

Finish

A range of finishes are available including matt and raw aluminium, brushed steel effect aluminium and polished white. Other anodised and RAL finishes are available on request.

Bespoke Sizes

Every canopy is bespoke, with sizes ranging from 500mm to 3000mm wide and with a 1000mm cantilever as standard to create maximum coverage of your openings. Part M compliant canopies are available on request.

Ultimate resistance

Extensive testing has shown La Pensilina can withstand loads of up to 350kg/m² without breaking.

The glass has been rigorously tested and will resist shattering, soft & hard impacts, post breakage resistance as well as extraction, dependant on glass used.

We can also advise on anchor depths based on size and type of support material, e.g. wall, block wall, concrete beam, etc.
